

Thunder Warriors Squad

Thunder Warriors were the elite super soldiers that marched with the Emperor to conquer Terra in the Wars of Unification. They were the first gene-enhanced warriors created by the Emperor, the precursors to the Adeptus Astartes. Wrought to be living weapons, the Thunder Warriors were physically stronger, more savage and more potent in combat than the later Astartes. They were however not designed for longevity and were lost to history by the time of the Great Crusade.
